

ES50 - EASY FLUSH WATER MANAGER & ES51 - EASY FLUSH WATER MANAGER with 2 mm Latching Valve

KEY BENEFITS

- Easy Install
- Adjustable Fill Time
- Adjustable Flushes / Day
- Flush Audit Feature
- Significant Water Saving Potentials
- Quick Payback On Rentals
- Use on Cistern or Direct Flushing Systems
- Retrofits Most Urinal Cisterns
- Anti Tamper Features

The EASYFLUSH is very quick to install and requires no drilling to your walls and decoration.

You can at any time determine how many flushes have occurred since installation/reset by pressing the "F" button.

If you press the "T" button it will tell you how many times per day the unit is set to flush.

The EASYFLUSH is powered by a simple 9 volt battery.

HOW DOES THE EASY FLUSH TIMER WORK ?

This timer is best used in conjunction with the Ureco Urinal outlet sleeve or Bioball.

It is designed to dramatically reduce the flushing frequency of your urinals which directly saves water and money.

The timer is installed directly into the cistern feed pipe and is battery operated. It has many features including a water use monitor which keeps a record of how many flushes have occurred between service visits.
