

EASYFLUSH WATER MANAGER

KEY BENEFITS

- PROGRAMMABLE URINAL FLUSH CONTROL
- LOW BATTERY ALARM
- 9v BATTERY
- OPTIMISES FLUSH CONTROL
- EASY INSTALLATION AND SET-UP
- SAVES WATER AND MONEY
- MAXIMISES THE FUNCTIONALITY OF THE BIOBALL & URINAL SLEEVES

The EASYFLUSH is designed to dramatically reduce the flushing frequency of your urinals which saves water and money, it is best used in conjunction with the Bioball or Urinal Outlet Sleeves to keep pipework clear and smelling fresh when the flushing frequency is reduced.

	Water Used Per Day [litres]	Water Cost Per Day	Water Used Per Year [litres]	Water Cost Per Year
Unmanaged 9L cistern	864	£4.66	315,360	£1,699.79
With EasyFlush System set to 4 flushes	36	£0.20	13,140	£70.83
TOTAL SAVINGS -	828 L	£4.46	302,220 L	£1,628.97

Calculations are based on £5.39 per metre cubed (1,000 Litres) this includes incoming & waste supply as per SWW Jan 2022.

The EASYFLUSH is very quick to install and requires no drilling into walls or ceilings, it is installed directly into the cistern feed pipe and is powered by a simple 9 volt battery as standard. We recommend the battery is replaced every 2 years OR when 'battery low alarm' sounds, to ensure the product continues to function correctly.

If you press the "T" button it will tell you how many times per day the unit is set to flush and you can determine how many flushes have occurred since installation/reset by pressing the "F" button at anytime.
