Basic Dimensions (mm)

Just one 9L cistern can flush up to 96 times a day when it is left to continually 'fill and flush' using up to 864 litres of water.

The EasyFlush is designed to dramatically reduce your water usage by choosing how many flushes a day you require and the option to prohibit flushing on certain days, saving water and money.

The EasyFlush is very quick to install as it requires no drilling into walls or ceilings, it is installed directly into the cistern feed pipe and is powered by a simple 9 volt battery.

It is best used in conjunction with the BioBall or Urinal Outlet Sleeves to keep pipe work clear and smelling fresh when the flushing frequency is reduced.

Potential Savings:

| | Water Used Per Day [litres] | Water Cost Per Day | Water Used Per Year [litres] | Water Cost Per Year |
|---|--------------------------------|-----------------------|---------------------------------|------------------------|
| Unmanaged 9L cistern | 864 | £4.66 | 315,360 | £1,699.79 |
| With EasyFlush System set to 4 flushes | 36 | £0.20 | 13,140 | £70.83 |
| TOTAL SAVINGS - | 828 L | £4.46 | 302,220 L | £1,628.97 |

Calculations are based on £5.39 per metre cubed (1,000 Litres) this includes incoming & waste supply as per SWW Jan 2022.
